Pensions dashboards

All your pension information in once place

Pensions dashboards are a UK government-backed tool. They will allow people to see all their pensions information, those benefits they have not yet started to receive, online, securely and in one place.

Dashboards will provide clear and simple information about multiple pension savings, including the State Pension.

Although the government has yet to confirm the exact date for pensions dashboards to launch, they are expected to be available (including through My Work Pension) sometime in the 2027/2028 financial year.

To find out more about pensions dashboards, including how they'll work and how they could help you, [you can watch a two-minute video by clicking here](#).
